

# Choose the right solution

When you're looking for the perfect headset, there are things you need to consider.

## Where are you working?

### At office desk

You spend most of your time in the office, at the desk and on the phone. Includes task-based knowledge-workers for Speak and Evolve series of products.

### Around the office

You spend more time in the office than on the road but you need freedom in the office to perform.

### On the go

You spend more time on the move and you need to be able to work from anywhere.

## What do you want to connect

You'll need to consider your connectivity needs to make sure your headset solution is compatible with your phone system. You can always contact a Jabra reseller if you need more advice.

Traditional desk phone

Softphone/Voip

Smartphone

Tablet

Multiple devices

## How noisy is your work environment

Whether it's a little chatter in the background or a colleague sitting right beside you, the right speakers help you get the most out of your calls while the right microphone delivers quality sound on the other end - where it really counts.

### Low noise

Omni-directional microphones pick up sound from any direction and block ambient and surrounding noise. Fine for the traditional, low-noise office.

### Average noise

Noise cancelling microphones and a mono speaker reduce unwanted background noise while ensuring you're still aware of your surroundings. Great for use in noisier, open office environments.

### High noise

Noise/ultra noise canceling microphones combined with duo speakers filter aggressive noise and can block the sound of someone sitting right beside you. Perfect for very noisy, distracting environments.

## Wireless or corded?

### Wireless headset solutions

Great if you want to move away from the desk or if you want a streamlined cordless design.

### Corded headset solutions

Perfect if you only work at your desk and you want the best possible sound quality in one or both ears.
