Nexa Desire POS

Touch POS Terminal

Overview

Stylish, modern, and with power and connectivity to spare, the Desire POS is a very capable and cost effective POS terminal.

It features a modern, high tech look, that adds to, rather than detracts from a counter. It features the option of a low cost, fanless Intel Bay Trail Quad Core 2.0Ghz CPU, or an Intel Core i5 CPU for demanding applications.

The touch panel is a next generation bezel free touch, so the LCD/touch panel front is completely flat, providing excellent spill resistance and a modern look.
